## GAMMA IRRADIATED CLEANROOM PENS AND MARKERS

### ABOUT

Gamma Irradiated pens and markers satisfy the regulatory requirements of the control of writing instruments used inside the aseptic areas.

Eliminates the unreliable and expensive surface sanitization of the writing instruments prior to their introduction and initial use inside aseptic environments.

Allows the introduction of a new, single pack of pens and / or markers for each shift. Simplifies the tracking of cleanroom writing instruments.

Can be supplied in any combination of Sharpie® markers or BIC® pens

- Packaged in an ISO6 cleanroom
- Each package includes a lot number for traceability
- Certificates of Conformance and Irradiation sent with shipment
- Packaged in Tyvek®/Mylar Chevron Peel Pouches
- Common Configurations: 1, 2, 5 or 10 per pack
